ECS

ARGOS
GATEWAY TO ADVANCED DATA

ECS ARGOS
Secure Collaboration. Augmented Analysis. Decision Dominance.

ECS Argos is a secure platform to anonymously leverage publicly available information (PAI), data science, and advanced analytics to produce actionable open-source intelligence (OSINT). Seamlessly leverage next-generation PAI tools without computational limitations, implementation headaches, and high costs. Argos provides unprecedented managed attribution for secure collaboration with military, civilian agency, coalition, and non-traditional partners. Enjoy secure, unclassified access to large language models (LLMs), automating intelligence analysis and saving hundreds of work hours.

Virtual Desktop
Launch a virtual desktop anywhere with ease through your web browser

PAI Toolset
Instantaneously access a host of advanced PAI tools such as Maltego, Anaconda, Zignal, and more

Managed Attribution
Operate virtually and securely from 60+ global egress points worldwide

Mission Partner Envrionments
Securely collaborate with key mission partners in-theater

Intelligence Automation
Leverage LLMs to automate intelligence analysis and save hundreds of work hours

## Unlock Powerful Investigative Analytics at an Affordable Cost

Pay-as-you-go Model
Pay for the services you need when you need them

Scale with the Cloud
Quickly scale your computational power in a secure cloud managed by ECS

Integrate with Microsoft Office365
Access the full Office365 suite, including OneDrive, from inside Argos' virtual desktop

Bring Your Own Device/ License (BYOD/BYOL)
Get complete, web-based access on any device and leverage licenses you already own

Defeat Insider Threats
Automate and customize user policies while tracking activity down to the key-stroke level

Operate Securely and in Compliance with IL-4
Advanced cloud security, multifactor authentication, and customizable monitoring solutions*

* Argos is IL-4 compliant under the ICD 503 RMF accreditation standards.

Securely Conduct Online Investigations with Managed Attribution

Argos PAI enables organizations to control their digital footprints using managed attribution. Organizations can easily manage and customize online identifiers while performing sensitive research and operations.

Operate virtually from any of 60+ locations worldwide

Data remains secure and safely stored in the U.S.

Enhance Your OSINT and PAI Expertise with Customized Training

ECS provides OSINT/PAI training using curricula customized to match your mission objectives. Our experts provide ongoing support to help keep your organization's investigative skills and techniques up-to-date in a world of evolving threats.
